HOST A STEM KIT PROJECT

*Help kids grow in the area of
Science, Technology, Engineering and Math!*

WHERE

Your workplace or other group setting

WHEN

Kit creation events can be set up anytime, anywhere. Help spark a child's imagination right where you are!

ABOUT

Discovering the wonder of how something works can be the spark that ignites a child's enthusiasm for learning. The world of science provides unlimited potential. In the time it takes to have lunch, employees can create a STEM kit and help light that spark in a child's imagination!

A STEM kit is comprised of a book, supplemental materials and all of the items necessary to complete an age appropriate science experiment.

STEM kits give teachers, child care workers and parents ready-to-use tools to unlock the possibilities for a child's future in science, math and related fields.
